

### Our Business

px group is a fully integrated infrastructure solutions business, with over 25 years' experience. We provide innovative operations management, engineering services and energy management solutions to partners in high hazard, highly regulated industries. Our focus is improving operating performance of commercial and industrial facilities, with zero harm to people, environment asset and reputation. Join us as we continue our success! In 2019 we were one of the Sunday Times Grant Thornton Top Track 250. In the north-east we're one of the largest growing companies, have won new operations and maintenance contracts and acquired a majority stake in Camm-Pro Limited, an oil/gas project management specialist.

### The Opportunity

px group ('px'), own and operate the 370 acre top tier COMAH site Saltend Chemicals Park (SCP) - near Hull. With a cluster of world-class chemicals and renewable energy businesses, SCP is strategically positioned on the UK's busiest ports complex - and is a location of world-scale manufacturing, operational, engineering and service excellence and, innovative technology.

Due to continual expansion and growth we're now looking for an additional Mechanical Technician with a commitment to delivering excellence and improvements in mechanical maintenance, to join our multi-disciplinary engineering and maintenance technician team.

In your new role you'll complete and contribute to a diverse range of mechanical maintenance activities, breakdown support, installation works and engineering support for activities on both our plant and equipment and that of our customers and clients. Your responsibilities will also include:

- Completing job reporting through CMMS failure reporting, lessons learned and feedback.
- Assisting others in identifying, specifying and purchasing spares.
- Completing work place safety and condition audits as required.
- Producing & contributing to procedures, work plans, project documents and contractor work scopes.
- Supervising contractors ensuring accordance with site safety, environmental and quality procedures.
- Work alongside other members of the Engineering and Maintenance/ Operations Team to review method statements, risk assessments & other required safety documentation for fitness for purpose.

You'll be supported with personalised on the job training and coaching and regular development and performance reviews to develop, maintain and improve your contributions and competence.

### Minimum Requirements:

- Time served mechanical apprenticeship & an NVQ 3/equivalent in a mechanical discipline.
- Experience with mechanical investigations, troubleshooting, planned repairs, predictive & preventative maintenance, equipment installation, fault finding.
- Experience of working at height and working with rotating equipment, valves and pipework.
- Working with engineering drawings & P&ID's.
- Experience with PSSR, DSEAR, HASAWA, LOLER.
- CMMS systems to complete accurate reporting, trending and improvement.
- Identification, specification and purchase requisition of spares.
- Supervising contractor personnel.
- Safe, systems of work: reviewing RAMs & other safety documentation.
- Understanding of Quality Assurance & Continuous Improvements in an engineering environment. Contribute to its delivery and maintenance
