

Non Invasive Inspections Technologies

14 March 2019

Old Trafford, Manchester

www.imeche.org/niit

From automated and remote methods to drones, free swimming devices, crawlers and other non-invasive methods, hear how site operators are employing new and novel methods for their inspections. Plus, hear specific guidance from the **Health and Safety Executive** to ensure that your organisation complies with the latest industry regulations.

Understand how your organisation can enhance safety and carry out inspections in previously inaccessible areas and hazardous environments while keeping to existing budgets, with speakers including:

- David Glass, Mechanical Engineering Team Leader, **HSE**
- Fraser Hardie, Manager-Special NDT Techniques, **Doosan Babcock**
- Edward Anderson, Senior Engineer -Pressure Vessels and Piping, **Sellafield Ltd**
- Gary Robinson, Senior Engineer - Pressure Systems, **SSE**
- Stuart Turner, Lead Engineer Pressure Systems, **BOC**

For full agenda and to book your place, please visit www.imeche.org/niit

Discount available for TSA members: as a supporting organisation of the event, Tank Storage Association members can save on their place. Simply book at the Supporting Organisation rate online or contact [IMechE Event Enquiries](#) and mention your membership.
