

# Saltend Chemicals Park

**OPERATION PRODUCTION ENGINEER**

*October 2018*

---

## Our Business

px operates on a 24 hour, 7 days a week basis, across a diverse range of low and high hazard industries including power, gas, fuel storage & also in energy trading. The group is continually expanding, providing operations, maintenance and management services and solutions throughout the UK and services to other global businesses and has experience in areas such as the Middle East, Europe and South America.

## The Opportunity

The Saltend Chemicals Park - near Hull is a cluster of world-class chemicals and renewable energy businesses at the heart of the UK's Energy Estuary. Strategically positioned on the banks of the Humber - the gateway to Europe and the UK's busiest ports complex - Saltend Chemicals Park, (SCP) is a location of world-scale manufacturing, operational excellence and innovative technology.

We are currently seeking a dynamic, proactive, results creating, Operations Production Engineer to join and contribute to the success of our Operations team. Your main responsibilities will be as a member of the Saltend Chemical Park (SCP) Operations Department management team, providing consistent approach, understanding and actions between all Operation's personnel, other employees and customers. In line with SHE, business, budgetary, quality & legislative requirements, you'll lead, direct, organise & manage assigned personnel and you'll provide engineering design support, trouble shooting and management of change.

## Minimum Requirements:

- HND in production or equivalent discipline.
- Contributing to an industrial 24/7 process in an Operations management role.
- Working cross functionally & with third parties delivering services, policies & initiatives. Ensuring compliance & customer service.
- Development & implementation of strategies, projects & initiatives.
- Process engineering, design, support, trouble shooting & management of change.
- Line management & development.
- Budget input and control.
- Incident control
- COMAH regulations and application
- Safe systems of work processes, procedures and documentation
- Management of change systems, processes and documentation
- Budget processes & systems.
- Chemical process assurance systems and documentation
- Microsoft office - word, excel, powerpoint, Pi/ historian database, data input systems.

***In order for your application to be progressed, all candidates must meet the minimum requirements of the job role person specification.***
